(a) Per-symbol loss comparison across configurations
H_Y theoretical
n-gram on Y
n-gram on X (normalized)
bits per Y symbol
penalty
k=1,M=2
k=1,M=3
k=1,M=4
k=2,M=2
k=2,M=3
k=3,M=2
(b) Fragmentation penalty decomposition: theoretical vs empirical
Phase MI (theoretical)
Oracle residual (theoretical)
Empirical penalty (loss_X - loss_Y)
bits per Y symbol
